ALPHA iQ™

### 1 PERSONALISED CLEANING

With its "**Sensor Nav System™**", the **ALPHA iQ™** robot cleaner identifies the configuration of your pool to optimise its movements and cleaning time. Its pressure sensor provides better superior wall climbing and waterline cleaning according to the depth of the pool.

### 2 EFFECTIVE SUCTION

Its patented **cyclone suction** is extremely powerful and long-lasting. Thanks to its extra-large suction capacity and very fine filtration system, the **ALPHA iQ™** optimally collects all types of debris.

### 3 EASE OF USE

Thanks to its patented **Lift System**, **ALPHA iQ™** is lighter when removing it from the water. Its simple access to its filter and the visibility offered by its transparent window makes it easy-to-use in all circumstances.

### 4 INTUITIVE CONTROLS

Monitor cleaning progress at any time through the intuitive interface of the **iAquaLink™** application. **ALPHA iQ™** is upgradeable thanks to possible optimisations and automatic remote updates.

## AVAILABLE ACCESSORIES

Very fine debris filter, Fine debris filter,  
Large debris filter, Protective cover

As it's **autonomous**, the **electric robot cleaner**, does not need to be connected to the filtration system. It collects debris directly in its own filter canister. Equipped with true artificial intelligence, it can **reach every corner of the pool, climb walls and clean the waterline**. Now able to connect to your WiFi network, it can be controlled from your smartphone through the iAquaLink™ application.
